Subject: DISTRICT 81

Why don't we eliminate District 86 to help New Orleans because their people chose not to come back after Katrina and yours did. How dare you try to take my District and place it under the jurisdiction of New Orleans. With your thought process, you really don't belong in public office as you are trying to disrupt the lives of many for a few. What makes New Orleans so special? I really would like an answer to that question. I do have alot of family and friends in Baton Rouge and will promise that if District 81 is disrupted that I will do all in my power to see that you are defeated for your election. Thank you.
