**Subject:** SB 24-----Congress

Good day, hope all is well.

As a lifetime resident of this area, as well as small business owner along the I-10 corridor, and city government official I would like to take the opportunity to express that I am in favor of keeping the I-10 corridor region from Lake Charles to Lafayette within the same district. I have served on other boards, including an economic development board, and can say without hesitation that these regions should remain unified and focused on their strengths which include, but are not limited to culture, history, resources, recreation, and industries. This is not anecdotal, but evidence-based and the teamwork along this corridor continues to intensify. Please consider these thoughts as you continue through this process. Meanwhile, this team along the I-10 corridor will continue presenting their focused and unified voice in a respectful manner. Thank you in advance for your time and consideration.

With kindest professional regards,

Stephen Van Hook
