"PART IV. COMPREHENSIVE LABOR MARKET INFORMATION SYSTEM

§71. Legislative intent and public policy

A. The legislature finds and declares that in order for our state to make better policy decisions in the focus and expenditure of public funds for workforce development, it must have a complete picture of our labor market including information on the present needs of our labor market, expert projections on future needs, and objective statistically based evaluations of programs currently in operation to satisfy such needs. This can best be accomplished by developing an accessible and comprehensive information system on available education and training programs.

B. The legislature also finds and declares that in order for our citizens, both businesses and individuals, to make better decisions in the expenditure of their private funds, they must have access to information on the present needs of our labor market, expert projections on future needs, and objective statistically based evaluations of programs currently in operation to satisfy such needs. This also can best be accomplished by developing accessible and comprehensive information on available education and training programs."
§72. Definitions

For purposes of this Part, the following terms shall have the meanings ascribed to them:

(1) "Commission" shall mean the Louisiana Workforce Commission as provided in R.S. 23:2042.

(2) "Conference" shall mean the Occupational Forecasting Conference as provided in R.S. 23:76.

(3) "System" shall mean the comprehensive information system as provided in R.S. 23:73.

(4) "Workforce development activity" shall mean any program, service, or activity that involves workforce preparation or vocational skills training. It shall also include any program, service, or activity that tends to improve an individual’s employment opportunities such as basic education, academic education, vocational, technical, or occupational education, job readiness training, job search training, etc.

§73. Comprehensive labor market information system

A. (1) The Louisiana Workforce Commission shall, directly, by contract, or by cooperative agreement, establish a comprehensive labor market information system. The information shall be provided, to the extent practicable, to reflect the state’s overall training and education effort. The system shall contain the following major components:

(a) A comprehensive system of consumer information on employment and training opportunities, continually updated and readily available in a user-friendly format.

(b) A report card or objective factual performance information about existing workforce development activities, continually updated and readily available in a user-friendly format.

(c) An information system on projected workforce growth and job growth and demand statewide and by geographic regions, periodically updated and readily available in a user-friendly format.

(2) The commission, in consultation with affected departments and offices, shall require modification of existing general purpose and program data systems to ensure that an appropriate workforce development component is included in the design, implementation, and reporting of such systems in order to fulfill the information requirements of this Part.

B. The commission shall supervise and control the system. It shall provide by rule for uniform definitions to be used in the system, for procedures for record linkages, for elements of information required to be reported, for requirements on aggregation for data release, and for any other matter necessary to effectuate the provisions of this Part.

C. The commission shall designate the Department of Labor as the agency to coordinate the development and implementation of the system and to maintain the system. In the development and maintenance of the system, the department may use existing data collection systems operated by it, and to the extent appropriate, establish electronic linkages to access data in the management information systems operated by other departments or offices of state government. The system shall work, to the extent possible, in conjunction with data collected by the State Occupational Coordinating Council. It shall be readily available for public access through a variety of media, including the worldwide web.

D. The system shall be established to provide the commission with information relevant to policymaking and to provide other agencies and policymakers and our citizens with information relevant to program management, administration, and effectiveness with respect to employment opportunities and training. To accomplish such purpose, the system may have several application layers giving a different kind of user access to the same database. Each application layer shall be tailored to the special needs and abilities of the category of persons to whom it was designed to provide information.

E. (1) All public officers, departments, agencies, offices, and authorities of the state and its political subdivisions shall provide such assistance and data as will enable such system to fulfill its purpose.

(2) The public entities whose data and assistance shall be considered necessary for the system to fulfill its purpose shall include the Departments of Economic Development, Education, Health and Hospitals, Labor, Public Safety and Corrections, and Social Services, and in the governor’s office, the Offices of Elderly Affairs, Lifelong Learning, Women’s Services, and Workforce Development, and Department of Veterans Affairs, and the State Board of Elementary and Secondary Education and the Board of Regents and any other public entity the commission deems necessary.

§74. Consumer information

A. For the consumer information component of the system, there shall be a user-friendly formatted inventory of available training opportunities, and to the extent possible, employment opportunities.

B. This component of the system shall be developed so that it may be available for access on the worldwide web no later than January 1, 1998.

§75. Report card; data exchange agreements; data distribution; personal identification prohibited

A. For the report card information component of the system, there shall be user-friendly formatted, objective factual performance information on training programs, including statistical information on placement rates, and other relevant data.

B. For the purpose of facilitating the objectives of this Part, public and private agencies engaged in, or responsible for, workforce development activities shall enter into interagency reciprocal data exchange agreements. Such agreements shall provide for automated record linkage and follow-up. To facilitate this process, each agency with workforce development data shall assign to each individual receiving its services a unique identifier to be used to link disparate data bases.

C. (1) Interagency data shall be distributed in a protected manner and in such a way so as not to permit the personal identification of any individual. If data is exchanged electronically on magnetic media, individually identifiable and firm-specific information shall be encrypted. Individually identifiable and firm-specific information shall be unencrypted during the file linkages performed in the computer systems core memory. While in the possession of other agencies, all files containing personally identifiable and firm-specific information shall be stored in a secure environment.
(2) Data shall only be exchanged under strictly controlled conditions. It shall be destroyed after all legitimate uses have been made of it. Secondary release of confidential or privacy-protected data or use other than as authorized by this Part shall be strictly prohibited.

(3) In addition to any other civil or criminal penalties, any person found in violation of this Subsection shall be fined not less than five hundred dollars nor more than two thousand dollars for each offense.

D. This component of the system shall be developed so that it may be available for access on the worldwide web no later than January 1, 2000.

§76. Forecasting

A. For the forecasting information component of the system, there shall be information on projected workforce growth and job growth and demand.

B. The information on projected workforce growth shall include the number of individuals employed and the number of individuals able and available for employment today and projected at a future date certain, both statewide and by geographic regions.

C. For the purpose of projecting job growth and demand, the Occupational Forecasting Conference is hereby established in the office of the governor. The Occupational Forecasting Conference shall develop such official information with respect to statewide and regional workforce development needs as the conference determines is necessary for state planning and budgeting. The official information of the conference shall include projections for the state as a whole and projections for specific geographic regions of the state. Approval of the official forecast of the skills necessary to fill the growth and demand jobs shall be by an affirmative vote of five principals.

(4) Once the job growth and demand forecasts are derived and approved by the conference, the conference shall determine the skills necessary to fill such needs. It may utilize the same process as that used for deriving the job growth and demand forecasts. Approval of the official forecast of the skills necessary to fill the growth and demand jobs shall also be by an affirmative vote of five principals.

(5) A final report of the top twenty-five future growth and demand jobs, statewide and by region, and the skills necessary to fill such jobs shall be published in the Louisiana Register and made available for access on the worldwide web. Such report shall also be available for purchase by private parties for the costs of reproduction.

(6) The chairman who is responsible for presiding over a session of a conference is responsible for preparing and distributing the necessary work papers prior to that session of the conference.
