WHEREAS, the oil and gas industry has developed technology which reduces the footprint of oil and gas development to a minimum and the industry mitigates this minimal impact with offsetting environmental enhancements in accordance with Louisiana's no net loss of wetlands policy; and

WHEREAS, the oil and gas industry has demonstrated its ability to develop outer continental shelf (OCS) resources in a manner which is environmentally responsible and technologically state of the art, resulting in minimal environmental impact and extraordinary hydrocarbon production in the Gulf of Mexico; and

WHEREAS, Lease Sale 181 offers an area of the Gulf of Mexico with significant oil and gas potential which can be developed with minimal environmental risk, and it is critical that this area be included in any national energy plan; and

WHEREAS, the Coastal Zone Management Act, reauthorization of which is currently pending in congress, contains certain provisions which have been applied in an unreasonable manner to the detriment of securing OCS energy, and congress should be urged, as a matter of national energy policy, to use the pending legislation to reform such provisions and to reform coastal zone management policies generally."
