**We can find solutions without a veto session**

“I and many members of the House don’t agree with the vetoes in general. However, Louisiana has a history of serving its citizens; I believe we can find solutions without calling a veto session that could produce unintended consequences.”

“I have reached out to the Governor to ask that if additional funding should become available within the fiscal year that those funds be used for our citizens with developmental disabilities and for the NOW waiver program.”

“More importantly, we should work to find permanent additional funding for these citizens and the NOW waivers for our next fiscal year and beyond.”
