Funding reflects the Special School District transfer pursuant to ACT 468 of 2021 RS

The department collected \$267.1 million less than the FY 21 budget. The majority of excess budget authority was in Recovery School District both IAT and FSGR revenues. The excess Federal budget authority was in Subgrantee Assistance due to the consolidation of federal grants from three programs to two.

The department collected \$3 million more in FY21 in the Recovery School District. This primarily associated with insurance proceeds.

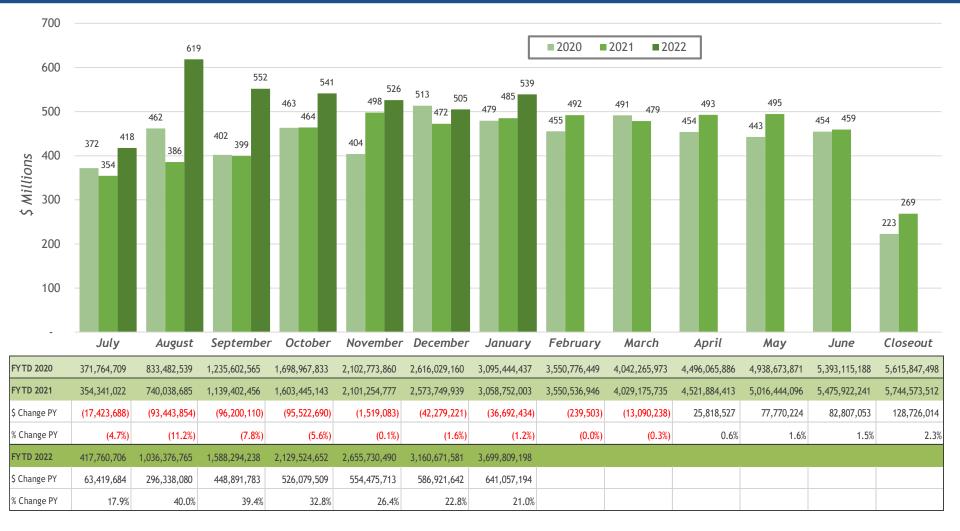

# EXISTING OPERATING BUDGET FY 22

The FY 2021-22 Existing Operating Budget (EOB) was frozen on December 1, 2021. This point-intime reference is used in both the Executive Budget and the General Appropriations Bill.

### **OVERVIEW**

The MFP currently provides block grants for 656,644 students attending 69 city and parish school districts, charter schools, Louisiana School for Math, Science and the Arts, New Orleans Center for the Creative Arts, Thrive Academy, Juvenile Justice schools, and Lab Schools. The current formula is allocated at \$4.0 billion of which \$3.75 billion is SGF and makes up 34.3% of total general fund spending

- BESE develops and adopts a formula used to determine the cost of the MFP
- Legislature considers the BESE-adopted formula through concurrent resolution, which must contain the formula adopted by BESE verbatim. The legislature cannot amend the BESE-adopted formula
- Louisiana State Constitution Art. 8, Section 13(B):
  - "The legislature shall annually appropriate funds sufficient to fully fund the current cost to the state of such a program..."
- Prior to approval, the legislature may return the formula to BESE with recommendations. If legislature fails to approve a formula, the last BESE and legislatively approved formula is used
- Only the governor may reduce the appropriation using means provided in the appropriation with 2/3 consent of both the House and the Senate. If a deficit is projected during the current year, the governor may reduce the MFP, but reductions may not exceed 1% and cannot apply to instructional activities

### The MFP formula calculation includes four levels:

### Level 1

Establishes base education cost per student and recognizes extra costs associated with specific students.

 Once the total cost is determined, local revenue is measured to determine the proportion of the cost to be covered by the state

### Level 2

Provides a financial incentive for local school systems to provide support for educational costs

### Level 3

Adds in legislative mandates, such as teacher and support worker pay raises, historical formula allocation, and other costs

#### Level 4

Funding for educational initiatives such as International associate teachers, dual enrollment, career and technical courses, and districts that serve students with high cost disabilities
