RE: House Concurrent Resolution 25

Dear President Alario, Speaker Barras, Secretary Robinson, and Commissioner Dardenne:

In accordance with House Concurrent Resolution 25 of the 2016 Regular Session my office has compiled a list of initiatives that have been and are continuing to be implemented and utilized to create efficiencies and savings.

- Decreased around the clock security
- Increased caseload of Investigators
- Reviewing and re-negotiating contracts for better value
- Reducing outside legal contracts and moving work in-house
- Right-sizing management and reviewing management levels
- Consolidated the fleet and property sections
- Updated aged fleet
- Streamlining supervision
- Reduction in travel by localizing staff

- Utilizing local agencies as a force multiplier to increase investigative mission
- Better coordination with local and state agencies to attack and increase investigative mission

In an effort to continue creating efficiencies and eliminating waste my office is reviewing the following sections, activities and projects for possible savings.

- Changing legal research contract
- BP Data Storage
- Eliminating New Orleans office lease and moving to Benson Towers; \$339,000 annually
- Reviewing cell phone contracts
- Reviewing IT systems and evaluating case management systems
- Requested the National Association of Attorneys General to perform an audit of the Department, providing benchmarks for best practices across the nation for Attorneys General

We look forward to working with fellow executive branch agencies to create additional savings through the reduction of duplicative services and the sharing of information for cost savings ideas.

For Louisiana,

Jeff Landry
Attorney General
